

🎯 Career Objective

Aspiring Data Scientist seeking an entry-level opportunity to apply skills in Python, SQL, machine learning, and data analysis to solve real-world problems. Eager to contribute to data-driven decision-making while continuously developing technical and analytical skills.

🎓 Education

Bachelor of Science (B.Sc.) in Computer Science

SASTRA Deemed to be University, SRC, Kumbakonam

2024 – Present

CGPA: 8.53/10

Higher Secondary Certificate (HSC)

Little Flower Higher Secondary School, Kumbakonam

2024

80.33%

Secondary School Leaving Certificate (SSLC)

Little Flower Higher Secondary School, Kumbakonam

2022

62%

💼 Internship Experience

Website Development Intern

01 Mar 2026 – 30 May 2026

Global Emperor Supply Chain & Logistics (GESCL)

gescl.com

- Built a product showcase website using Zoho Sites for vegetables, fruits, and spices.
- Developed user-friendly interfaces and supported website optimization and compatibility.
- Collaborated with the supply chain team on agricultural digital transformation initiatives.

Data Science Intern

21 Aug 2026 – 20 Sep 2026

Thiranex

- Cleaned and preprocessed raw data, visualizing key findings.
- Built and evaluated a supervised machine learning model for prediction.
- Performed exploratory data analysis to identify patterns and relationships.
- Completed a domain-specific data science project and presented findings visually.

📁 Projects

Skin Disease Classification & RAG Chatbot

[GitHub](#)

Python, CNN, Streamlit, LangChain, ChromaDB, Groq

- Developed a CNN-based skin disease classifier integrated with an interactive RAG chatbot.
- Built a PDF retrieval pipeline using Hugging Face embeddings and ChromaDB.
- Integrated Groq-hosted Llama for contextual responses and multi-turn conversations.

HeartDict – Heart Disease Prediction App

[GitHub](#)

Python, Scikit-learn, ONNX, Kotlin, Android Studio

- Developed an Android application for ML-based heart disease prediction.
- Converted a Python-trained model to ONNX using skl2onnx for Android integration.
- Integrated ONNX inference with a Kotlin-based interface for user input and predictions.

Paddy Field Weed Detection

Python, YOLO, CNN, Computer Vision

Ongoing Research

- Collecting and preprocessing weed images for deep learning model training.
- Developing YOLO- and CNN-based models to detect and localize weeds in paddy fields.
- Aiming to enable precision spraying and reduce unnecessary herbicide usage.

Technical Skills

Programming Languages: C, C++, Python, Java, Kotlin, SQL

AI and Machine Learning: Machine Learning, Deep Learning, CNN, YOLO, ResNet, MobileNetV2, RAG

Libraries and Frameworks: TensorFlow, Keras, scikit-learn, pandas, NumPy, Matplotlib, Seaborn

Tools and Development: Git, GitHub, Android Studio, Streamlit, ONNX

Areas of Interest: Transformers, Large Language Models (LLMs), Multi-Agent Systems, AI Automation

Soft Skills

- Problem Solving
- Adaptability
- Time Management
- Teamwork

Languages

- Tamil
- English

Extracurricular Activities

- Co-organizing FOSSFURY 26, a programming MCQ competition through the SFOSS Association at SASTRA SRC, Sep 2026. Collaborated with teammates to develop the competition's web-based quiz platform. [GitHub](#)
- Volunteered through the National Service Scheme (NSS) at a Tamil Nadu government job fair.
- Volunteered through NSS for a two-day cultural event featuring Therukoothu and Kathakali, conducted by the South Zone Cultural Centre at SASTRA's Srinivasa Ramanujan Centre, Kumbakonam.
- Attended a hands-on Agentic AI workshop organized by Mathematica, 2025, completing practical exercises in Model Context Protocol (MCP) and AI-assisted development (vibe coding).

Declaration

I hereby declare that the information provided above is true and accurate to the best of my knowledge. I take full responsibility for its authenticity and affirm my commitment to maintaining honesty, integrity, and professionalism in all my endeavors.

ARIKARAN A

Kumbakonam, September 18, 2026
